November 4 Client Feedback

Combining Our Mission and Vision pages content as they are very similar, and it is on the same page on the original website

- It would make it more concise and less repetitive

We have a lot of “fillers”, media and text without a specific purpose

- Either find applicable content or get rid of it and replace it with something that has purpose
- Volunteer, sign up, keep me informed

Ensure pictures properly fit background if they have a white background, most notably on our programs page

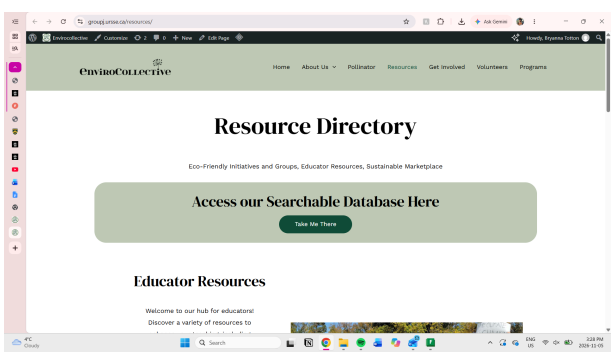

The Pollinator

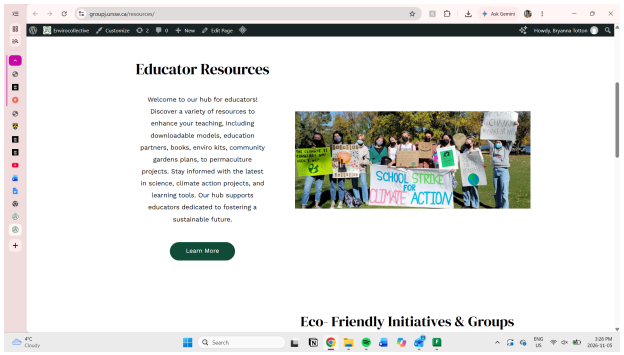

- Plug in to cycle through posts
- More graphics
- It did not seem like Rob would want to update any posts or anything of that nature
    - Find a way to work around this
    - Consider a different format that does not require updates

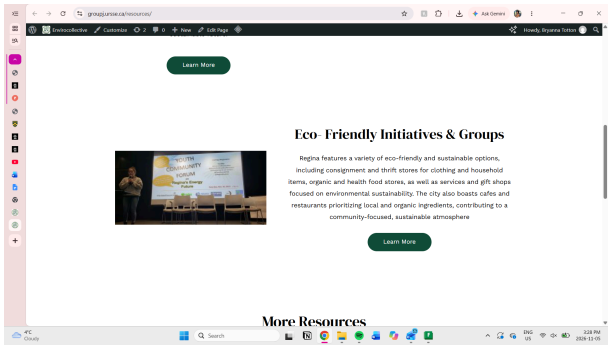

Resources

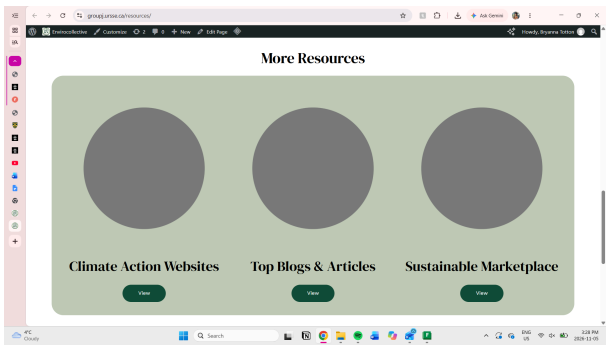

1. Highlight database
2. Be more descriptive of key areas
3. Remove search

Updated page:

Home

- Hamburger menu
- Elements that stack (Astra)

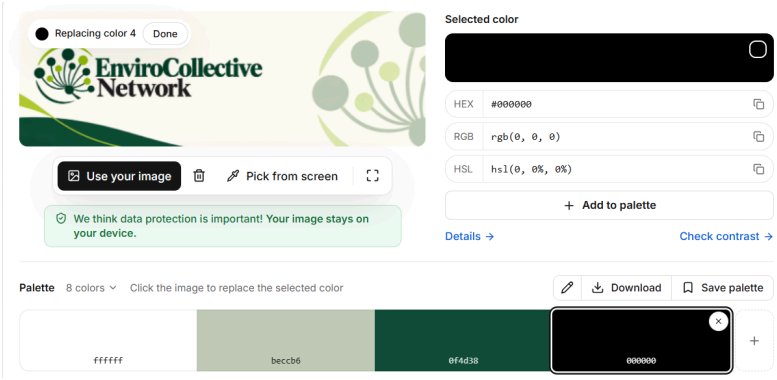

About Us

What we have changed:

- Adjusted the overlay to increase accessibility of the Hero
- Created cohesiveness between the pages
- Fully developed “Meet the Members” page

Colour and Contrast

- Created a distinct colour palette that can be adjusted later on but will ensure cohesiveness through development
- No more random colours
- Colours were selected from the new logo as per Tim’s recommendation

Selected color

HEX #000000

RGB rgb(0, 0, 0)

HSL hsl(0, 0%, 0%)
